About This Game

A fun indie game which tells the story of a cute blue robot that has to SOMEHOW save the world from the villains...
The story line contains a lot of emotional and funny moments combined with tuff enemies!

The game is a retro styled game , with simple mechanics as WASD to move it is very simple to learn and like but also very Very tuff in some levels , as the Developer , I really do like games in this style so this is why I decided to make one myself.

Throughout the game you will meet a lot of people that you can talk to by simply pressing the W button , they will explain most of the story to you , also there are many cool bosses and enemies that use different and unique mechanics such as a flying machine that is triggered by you facing the other direction and running away from it or a huge boss that shoots rapid lasers at you , at the buttom line - I do really recommend the game to people who like the genre and I think you can have a lot of fun.

So , What are you going to actually see in the game ? Throughout the game , you will be able to explore a deep world that contains many many things you can interact with , for example : if you find yourself with low health points and there is a bed in

your room , you are free to use it whenever you want and your health will go up to the maximum. You are going to go through a tutorial in the first time you play the game that is going to explain exactly how to use the inventory , talk to people in the game and how to destroy your enemies too!

When you will reach the harder levels of the game , you will find yourself spending a lot of time trying to beat that one enemy , for example a huge crowd of purple flies that flies after you and won't leave you until you either kill them all or die. You can find some levels that also require a bit of thinking , just for example a level where you need to think about something to pick up from the ground and use it to crack open a jail door.

Another thing you can find in this game is a small sub-story about betrayal , if you are going to reach a pretty high level in the game you will find out not everyone that you thought was on your side and you needed to help was that innocent and you will end up fighting against someone you didn't even think about you will...

As the developer and also a fan of games with old style , I really do recommend you to try out my game , it features basically any retro game feature with a special difference and I think you can really enjoy it.

Sooner or later, even the most peaceable kingdoms find themselves at odds with their neighbors. Negotiation, or response to overtures of appeasement, fails, the clash of steel is close behind.

This section contains rules for you as a kingdom preparing them for battle on land, at sea, or in the conventional armies, utilizing PCs as part of mass forces, and going beyond the battlefield to deal with the political and social consequences of war.

These rules provide an abstract, narrative mass battle scenario without getting bogged down in tactical details, and the realities of the battlefield. These wars, provide a highly tactical simulation, or they are intended to incorporate warfare into a small-scale adventuring and roleplaying.

Sample Armies

Most of these armies are Medium, showing a player or GM what tactics, resources, and special abilities a typical army of that type has, yet still keeping it easy to scale the army to a larger or smaller size. If an army has a resource, the listed Consumption is for an army of the listed size; if you change the size of the army, multiply the Consumption cost for its related size, and then divide the new size, then add the cost for recruiting the army.

It monster's special abilities or does not have, and uses the conditions when the conditions are met.

bonus is automatically granted when the conditions are met.

unit's special defenses should affect an opposing army. Determining an army's special defenses is a science.

Commanders

helps maximize its effectiveness and can provide special bonuses to an army. If a PC or NPC. Unless you decide to command an army personally or the GM is an exceptional commander through adventuring and roleplaying, a new army's exceptional leader who provides no bonuses to the army.

Commander's name (and class and level, if notable).

Commander's Hit Dice (usually equal to its character level for a PC). Divide the Hit Dice by 5 (minimum 0) and add that number to the army's Morale checks.

Commander's leadership score is its character level + Charisma modifier. If the commander is a PC, use HD instead of character level. If the commander has an appropriate training (GM's discretion), increase this value by 3. This number is a prerequisite for the army's Morale checks.

Commander's maximum Morale is 10, plus 1 for every 5 Hit Dice possessed. A new or returning commander might know no more about the army than a common soldier. Gain them from victories in a previous campaign. A commander acting as a general might have one boon from a previous campaign.

Commander's Morale is its character level + Charisma modifier. If the commander is a PC, use HD instead of character level. If the commander has an appropriate training (GM's discretion), increase this value by 3. This number is a prerequisite for the army's Morale checks.

Without a commander and no other units available to fill that slot, the army loses 1 Morale per week.
